SHIRLEY TEMPLE

New
Ruffled
Gladiolus
by
PRUITT

Season
1938

D. S. PRUITT
Box 402
EUGENE, OREGON

Greetings!

WE take this opportunity to thank our many friends and customers for the nice orders given us last year, and hope you send us still more orders this season. We do our best to satisfy each and every customer, no matter how small the order may be. We realize a satisfied customer is our best advertisement.

Our United States have enjoyed a year of prosperity and may it continue. What has made this condition is the turning over of money. We cannot make money and keep it all for ourselves. Most of it, of course, has to go for necessities. But let's pause and have some for luxury.

To those who love the garden and outdoors nothing is more fascinating and recreational than the flower garden. No flower garden is complete without the Gladiolus, especially some of the newer varieties.

May this little catalogue we are sending out this year increase the glad lover's interest in our greatest of flowers.

At the same time we hope it helps to make still more lovers of the gladiolus.

MR. AND MRS. D. S. PRUITT.

FOREWORD

In building this catalogue, though far from complete, we have tried to make it as interesting as possible for the pages it carries. We have spent considerable time and money collecting the pictures shown herein. I have been paid the compliment, or rather accused of being an artist getting good pictures. I must say I do not feel I have outclassed many other growers in this line. I have seen many fine pictures by others. The beautiful new varieties being released is in part responsible for this.

In addition to the three new varieties of my own creation now on the market, I am releasing three new ones this year. Each of these have been grown and bloomed four years. This gives assurance of full establishment of the variety. At the same time it gives me a liberal amount of stock of each, which enables me to place the price in the reach of everyone. Regardless of the reasonable price of these new varieties, I must say they are the equal if not better than any new ones being offered, no matter how high the price be.

This is not finding fault with others for asking higher prices. As we should be governed by the amount of stock at the time of release.

Prices

Prices herein are prepaid to you. Where priced by ten or the dozen, one hundred will be seven times the ten rate.

Twenty-five per cent with order will hold for further orders.

No orders filled for less than \$1.00.

Will be pleased to quote special thousand lot price not prepaid upon request, if same is in commercial quantity.

Planting

A great deal has been said as to the best way to plant. In fact, that subject has just about been covered. One thing I would like to impress on the minds of all growers. This I have learned by experience. We do not plant our large bulbs deep enough. We throw out a furrow with a hoe or plow and it leaves a bank of dirt on each side that makes it appear we are planting deep enough. Just place a large bulb in one of such trenches and level off the ground. Then dig down to the bulb and see how near it is to the surface. Be careful or you will rake it out. A number two and larger bulb should be 4 to 7 inches below the ground level. This will not give you so many bulblets but will hold the temperature down in the warm part of the day and prevent stem crooks. Like many other plants the gladiolus makes all or most of its growth at night. When a vigorous plant begins making bloom stem above the leaves it grows very fast and is very tender in the morning. Then comes the terrible heat of the day. The ground is heated at the surface and the plant wilts. Over goes the tender stem. The following night it tries to straighten itself up but is unable to do so completely. This is called stem weakness. This fact I am not denying; only giving this as a remedy. Try it and see if it is worth while. Do not use much barnyard manure. If so, place it on the ground in the fall and let the winter weather leach it into the ground.

New Era

(Ellis-Majeski)

I consider the greatest recent introduction in its class. One that will be with us for years to come.

Its color and ruffledness are truly wonderful. Combined with its proven commercial qualities as a cut flower, is destined to carry it to the top.

We had enough flowers from it to try out the flower market in a small way this past season. To say the least, it created a sensation wherever shown. It grew almost 6 feet high for us from large bulbs, carrying from eight to ten blooms open at one time. It has the best of keeping qualities as a cut flower, blooming out to the tip.

It increases fast enough, growing readily from bulb-lets. Try 100 or more and get started with this lovely gladiolus.

Bulblets25

Early Peach

(Pruitt)

Peach-red blending to ivory in the throat of upper petals. Lower petals blotched a warm buff with stripes and pencils of rose-red. Petals beautifully flaked scarlet. Six or seven wide open florets open at a time. Stem and spike straight and strong. Good bulblets producer and a splendid germinator. Has won many ribbons the past season and I want to thank my friends for the nice letters of praise I have received. Having a nice stock, I am placing it within the easy reach of everyone.

EARLY PEACH

Leona

Seedling No. 140-34

(Pruitt)

A most beautiful rich rose red, carrying six to eight fine ruffled blooms open on a tall slim wiry spike that never crooks under normal growing conditions. This variety has been greatly admired by everyone who has seen it. Was first seedling the past summer at the Have de Grace Gladiolus show.

It makes ample bulblets that grow readily. Together with Ellen Marie and Valeria it has been bloomed four times, assuring a well established variety and giving us enough stock of each to enable us to make the low price we are releasing them at.

Please note the reasonable price we ask for the bulblets and small bulbs. Also the quantity reduction, giving those who buy it an opportunity to get a good start at a reasonable price.

Read carefully our guarantee on these three outstanding varieties in another place in this catalogue.

Paradise

(Pruitt)

Clear apricot, opening 6-7 large florets at a time. Tall, straight spikes with perfect placement. Robust grower, heavy producer, germinates well. A good commercial. Early.

Has won many ribbons the past season and I want to thank my friends for the nice letters of praise I have received. Having a nice stock, I am placing it within the easy reach of everyone.

PARADISE

Vagabond Prince

(Palmer)

Unusual iridescent garnet brown, lighter in upper throat and with a small blotch of glowing flame scarlet on lip petal. Eight to ten well placed medium large blooms open at a time. Rather odd color but very distinctive, beautiful, and entirely unlike anything else. A most gorgeous variety and one that every amateur will want in his garden. A fine grower and good propagator. One of the "must haves".

Valeria

Seedling No. 38-34

(Pruitt)

I am sure this lovely flower has a great future both as a commercial and exhibition. Pronounced by one prominent grower as a perfect glad. Was given an award of merit at the Maryland trial gardens the past summer. Has given good account of itself everywhere grown, even standing up under the terrific heat and dry weather experienced the past two or three years in parts of the east. It is a true rival of the great Dr. Bennett, but much better in every way. Never crooks for me and scarcely ever has a flower out of place. Carries five to seven large ruffled flowers open at a time. Of fine substance and keeping quality. Has been called a pink by some but if it is a pink it is so pink it is red. A very soft red with a narrow mark of light cream in the throat.

Do not miss getting started this year with this one.

VALERIA

Shirley Temple

*Grown from
small bulbs.*

(D. S. Pruitt)

The greatest sensation in our garden. As it grows for us it excels all the creams and whites combined. I hesitate to praise it as highly as I feel like doing because it is my own creation.

Though it has only gone out in small lots, we have received many letters of praise in its behalf. I had the pleasure of having many prominent growers visit us the past blooming season, as follows: Elmer Gove, Carl Salbach, Ralph Baerman, Leonard Long, a prominent grower from the flower district of Florida, some from Canada, and a number of other prominent growers on the west coast. We will leave part of the praise to them. You are invited to ask anyone who saw it growing for me or saw it as it grew for others.

In color it is a light cream with a rich cream throat, beautifully ruffled. Very heavy substance of the best keeping qualities after cutting, blooming out to the last flower. Multiplies good and should take the country as a commercial in the very near future.

Owing to the use of an excessive amount of gas in treating the bulbs of Shirley Temple last year, they were damaged. Fully 25 per cent of them failed to germinate. I am glad to replace all of such bulbs with the increase you should have, based on the increase I get, which is good. These will be replaced no matter from whom you bought them.

Bulblets, per qt. \$3.00.

MINUET

Zuni

(Mitsch)

A refined combination of salmon and slate with inconspicuous light orange salmon feather. Florets of medium size, well faced with up to ten open on a tall, long spike, having a good number of buds still to bloom. Evenly and delicately ruffled petal edges. One of the most beautiful smokies and a strong, vigorous grower making good spikes and large bulbs frequently from bulblets. A seedling from Picardy and Lighthouse and a rapid propagator.

Bulblets, per 5, \$1.20	

Amador

(Kingsley)

A prize winning red. The form of the flower is good, the placement being perfect. The stem is strong without clumsiness and the color is about as bright as it can be without becoming harsh. A red that does not turn black at the edges and keeps its sparkling qualities under electric lights. A brilliant gladiolus with a brilliant future.

INTERNATIONAL EDITION THE GLADIOLUS — 1938

Bound in Boards and Cloth

272 Pages

24 Illustrations

Published by

THE NEW ENGLAND GLADIOLUS SOCIETY, INC.

An International Society — The Largest Gladiolus Society in the World

Publication date January 1, 1938

A copy of the book will be presented to every member whose dues for 1938 are paid.

CONTENTS

AROUND THE WORLD WITH THE GLADIOLUS

Chapters from the following countries:

AFRICA — The Home of the Gladiolus Species has produced a real strain of fragrant glads with a very strong and delightfully sweet perfume.

AUSTRALIA — The land of the giants.

CANADA — The home of the world's favorite glad — Picardy.

CZECHOSLOVAKIA — Including pictures of Czechoslovakian originations which will surprise you.

ENGLAND — Including a picture of that "Grand Old Glad Man", Maj. George Churcher.

ESTONIA — The young republic starts glad growing.

GERMANY — The home of the master hybridizers. The Pfitzer family with pictures of some of their newest.

HAWAII, NETHERLANDS, NEW ZEALAND.

PHILIPPINE ISLANDS — Including interesting pictures.

SCOTLAND, SPAIN, TASMANIA, TRINIDAD.

ARTICLES OF INTEREST FROM ALL SECTIONS OF THE UNITED STATES.

CAL JORDAN'S PREMIERE, an intensely interesting chapter in the life of that "Down East" character which gives much help to the beginner.

ALL THE LATEST INFORMATION ON RESEARCH AND GLADIOLUS DISEASES. HOW THE NEW VARIETIES ARE PERFORMING, AND A WEALTH OF OTHER INTERESTING MATERIAL.

AN OUTSTANDING BOOK WHICH YOU MUST HAVE.

Our Guarantee

Spoken of in the catalogue was omitted for some reason or other. It is as follows: Any one buying two or all three of our new releases "Ellen Marie", "Valeria", and "Leona" who is not satisfied with any may exchange the stock they have after the season's trial, for one of the three they like best. If, however, you do not like any of them you may exchange your stock for anything listed in the catalogue of equal value.

You are taking no chances on these new varieties in this way. Please note that I am offering bulblets at a reasonable price and you do not have to wait two or three years to get started in these varieties. I am giving you a chance to grow up with them along with me.

Are you a member of The New England Gladiolus Society or the National Gladiolus Society?

If you are not, become one free. Any one sending me an order for two dollars worth of bulbs and including an extra dollar for one, or two dollars extra if you wish to become a member of both. I will include with your order the amount of the subscription in bulbs of your choice from my catalogue. My introductions preferred. Make two or three selections as this may draw heavily on some varieties.

Let's make the gladiolus our national flower. Let's become a member of our societies and help those who help us. Let's pull together. Otherwise we pull apart. We have something worthwhile, THE GLAD. So let's be one big "glad" family and leave off our jealousy and hatred. Say something good of our neighbor, or say nothing at all.

This offer I am making of my own free will, without even the societies themselves knowing a thing about it. In addition to this I am giving several hundred dollars worth of bulbs as prizes to the winners at the major shows over the country.

For this I expect no compensation and will ask the societies not to give me any undue publicity on account of same.

Most sincerely yours,
PRUITT'S GLAD GARDENS

ELLEN MARIE

Ellen Marie

Seedling No. 49-34

(By D. S. Pruitt)

One of our new introductions for 1938. Named for my wife. This is a wonderful glad. Very large and beautifully ruffled. In color it is grand; hard to describe. I will say a very rich salmon pink, with light buff throat mark. Almost a self color without flecking. Early bloomer, growing medium high. Stiff wiry stem that never crooks, but the flowers are so large and heavy it will bend the plant over if planted shallow in loose ground, as all large bulbs should be planted much deeper than most people plant them. I will say be sure and get them 5 or 6 inches under the level surface of the ground, not 5 or 6 inches under the top of the ridge thrown up in making the furrow and covering. This beautiful new variety has been bloomed four times the same as the other two new ones I am releasing along with it, making sure it is well established. Get started now and grow up with it.

Bulbs	Each	Per 10	Per 100
No. 1..	\$2.00	\$15.00	\$100.00
No. 2..	1.50	10.00	75.00
No. 3..	1.00	7.50	50.00
No. 4..	.75	5.00	35.00
No. 5..	.50	4.00	20.00
No. 6..	.35	3.00	15.00
Bulblets	..	1.00	5.00

Bulblets, per 1000, \$25.00
